

MILF TOKEN ECOSYSTEM WHITE PAPER

MILFTOKEN.NET

INTRODUCTION

Milf Token was created with one mission in mind. What would happen if a cryptocurrency project combined utility/functionality and NFTs with actual meme-ability?

We understood that the NFT world was the future and it was exciting, but we quickly realized that the average person had a strong barrier to entry. First, you had to understand what a NFT is, then you had to figure out how to convert your money into a specific crypto based on the NFT platform you wanted to make a purchase on and lastly you had to spend tens of thousands of dollars (if not more) to get a NFT.

As you can imagine, that's a lot for anyone to take on which is why most regular people have stayed away from NFTs.

Thus, we imagined Milf Token could be the solution to that and much more. We wanted to create a token that airdropped NFTs right to the wallet of people holding \$MILF token.

People no longer had to fork up tens of thousands of dollars or figure out how to buy and securely store NFTs from random exchanges. With the simple purchase of \$MILF token, they would get NFTs airdropped safely and securely into their wallets. All people had to do was hold \$MILF and they in turn would get rewarded with NFTs based around 3D Voxels of MILFs created by the team and community.

With that thought in our minds, we began developing the MILF Token ecosystem in earnest.

TECHNOLOGY / ECOSYSTEM

MILF Token creates NFTs that are airdropped to holders of \$MILF. MILF Token is built on Ethereum to support its ability to airdrop NFTs cost effectively to their holders.

Airdrops are done in bulk using a partner platform where we mint the NFTs - Cargo.Build. Utilizing the XDAI network, we are able to airdrop thousands of NFTs in a matter of seconds for as much as \$8-\$15.

Our NFTs are designed using Voxel 3D drawings with light animations and sometimes sound effects/music. The value of these NFTs have been proven over time repeatedly as holders of \$MILF token have not only cherished their NFTs, but have also gone out on the open market to resell their NFTs which has been done successfully dozens of times.

Why ETH?

We chose Ethereum to build our token upon because it checked all the boxes to support our functionality. Ethereum (ETH) is something that is easily accessible for most people, which we thought would help bridge the difficulty to enter the NFT space. Additionally, Ethereum support our desire to airdrop NFTs to our holders thanks to their agile ecosystem.

OPPORTUNITY SIZE & REVENUE MODEL

The MILF team's first priority is building out the airdrop technology and a marketplace for users to be able to buy, sell and list NFTs within their ecosystem.

The proposed revenue model for MILF token is set to kick in once the marketplace has been fully launched to the public. MILF token plans to take a transaction fee of 3.5% on all transactions facilitated (buys/sells) through the MILF NFT marketplace. This transaction fee is subject to change after launch based on key performing metrics.

For user onboarding, once the platform is built to an MVP level, the team will continue to promote their marketplace to current holders of \$MILF and utilize their active user base and community to kickstart their launch. During this initial phase, MILF will continue to build the user base and participation of their marketplace by rewarding sign ups with exclusive opportunities to win and earn more NFTs.

TEAM COMPENSATION

To adhere to provide full disclosure to participants in the MILF token ecosystem, here is the following compensation plan offered to launch team members for their work and efforts in the MILF token project.

Each launch member was paid in an allocation of \$MILF token. Every member was paid 100,000,000 (100 million) tokens for their efforts pre and post launch pertaining to the MILF project. These 100 million tokens were paid out in the form of \$MILF tokens.

The launch members agreed to a period of not selling these tokens for the first 7 days after launch. From that time period, these launch members have the full ability to sell their \$MILF tokens to liquidate their compensation.

DISCLAIMERS

General Sustainability:

The acquisition of Tokens is only suitable for financially sophisticated persons who are capable of evaluating the merits and risks of such an acquisition, or other persons who have been professionally advised with regard to token acquisition and who have sufficient financial resources to be able to bear any losses that may arise therefrom (which may be equal to the whole amount spent in connection with the token acquisition). Such an acquisition should not be seen as an investment or a financial asset. Acquisition of tokens should merely be seen as a means of participating in our ecosystem to receive NFTs which can then be collected, sold or bought.

CONCLUSION / SUMMARY

The MILF Token project started with the seed of an idea. What could happen with combining NFTs, utility functions and meme-ability all in one project? Could it actually work? Could we follow the perfect storm of other digital currencies before us such as Doge or Shiba Inu, except perpetuate something that has functionality and rewards NFTs to holders, instead?

So far so good.

In summary, MILF Token was created to bridge the gap between NFTs & how users can acquire them. App until MILF Token, the only other way people acquired NFTs were through marketplaces by winning and placing bids. The amount of steps required to obtain an NFT deterred a lot of people from participating in the realm of NFTs. That was until we came along....

MILF Token acts as an entry pass to participate in our ecosystem, based on how many tokens you hold determines what privileges you have. For instance, in order to receive an NFT from us, you have to be holding MILF Token. The more you hold the more access to different NFT drops you will obtain.

Lastly, MILF Token is access into our ever growing NFT ecosystem whether to be used to buy MILFs, receive them via airdrop or vote on the next one the is created. Anything and everything we do on our ecosystem will require users to have MILF token.
